

THE SKY IS NOT THE LIMIT!

(I'M PRETTY SURE THERE ARE FOOTPRINTS ON THE MOON.)

Every time I hear someone exclaim, "The Sky's the limit!" with gusto and exuberance,
My reaction is always the same.

I want to shake them within an inch of their life and cry,
"O ye of little faith and withered dreams!"

Seriously ... the sky's the limit?

Why on Earth would anyone set preconceived shortfalls that tether them down
And prevent them from reaching their full potential ... and beyond?

I'm telling you,

The sky is not the limit.

If it were,

How do you explain the footprints on the moon?

To soar past obstacles in our paths,

The trick is to simply aim high above them.

Look past the midnight skies where there are not stars to blind us,

No meteors to impede us,

And no gravity to slow us down.

Sure, short-term goals are important stepping stones,

But keep your mind open to warp-drive capability.

With a twinkle in your eye,

A smile on your lips,

And purpose in your heart,

Set your sights on the infinite possibilities in front of you.

Far beyond your wildest dreams,

You really are limitless in every way.

The opportunity is there.

Decide to make it a reality.
