### U2: Population & Migration

**Directions: Read Ch 2 about Population and complete the following questions while reading; answer on your own paper in complete sentences. You may ALSO complete separate notes of your own on the chapter.**

	Task	Due Dates
Part I	Map Analysis	Day of Exam:
Part II	Reading Comprehension	Day of Exam:

#### **Part I - Map Analysis**

- Carefully examine the map on p. 48 - World Population Distribution. Identify the type of thematic map used. Write one (1) true statement that would describe the distribution pattern shown on this map.
- Carefully examine the map on p. 55 - Countries with Total Fertility Rate. Identify the type of thematic map used. Write one (1) true statement that would describe the distribution pattern shown on this map.
- Carefully examine the maps on p. 72 - CBR Change 1990-2015. Identify the type of thematic map used. Write one (1) true statement that would describe the distribution pattern shown on this map.

#### **Part II - Reading Comprehension**

- Create a chart like this on your own paper. Complete it to identify some of the world's areas of high population density.

Region	Areas of high population density	Reason for high population density in those areas
East Asia		
South Asia		
Europe		
North America		

- Summarize the theories of Thomas Malthus. What are some criticisms of his theories?
- At the regional and national scales, population growth varies widely. Identify one region or country with a high growth rate and identify one reason for it. Identify one region or country with a low growth rate and identify one reason for it.
- We will be talking about the Demographic Transition Model in class; what are some reasons why there are lower birth rates in stages 4 and 5?
- What are the leading reasons why some countries have a high Infant Mortality Rate (IMR)? What are some areas with high IMRs?
- What are the similarities and differences between the malaria and AIDS epidemics?
- Give specific example of expansive and restrictive population policies.
